

Do you love field trips? Read the things that Lily discovered during their field trip.

Field Trip

Lily was very excited to wake up in the morning. Today is their educational field trip at Oceanic Park. All students and teachers will meet in school and will ride in a bus.

“Mom, let's go now”, said Lily.

“You have to eat first your breakfast, Lily.”

“But Mom, we will be late.”

“We will not be late, Lily, trust me. You still have one hour left. Besides, I am still preparing your lunch box.”

“All right.”

She started eating her breakfast.

When they were at Oceanic Park, all students enjoyed taking picture of everything they saw in the large aquarium. Lily saw a fish with an orange color.

“Teacher, what kind of fish is this?”

“It's a goldfish, Lily.”

“Goldfish is a freshwater fish. It is the most commonly kept aquarium fish.”

“Do all goldfish have orange color, teacher?” asked Luna.

“No, goldfish has a variety of colors. Some are red, yellow, black, white or lemon,” said the teacher. “They also vary in size, shape and fin.

“Is Nemo a goldfish?” asked Lily.

“Nemo is a clownfish, Lily.” The teacher answered.

“Wow. I love Nemo,” said Lily.
